COMPANY PROFILE

Volta Motor has taken its name from Alessandro Giuseppe Antonio Anastasio who is an Italian physicist of Russian origin whose invention of the first electrochemical battery. It's been established through its dynamic staff in order to be associated with economical, environmental and high quality transportation.

Its products were produced as a result of the commercialisation of many award-winning R&D projects that were carried out during the years of establishment have been well-liked by its consumers within a very short time, and it has become one of the top selling electrical vehicle brands of Turkey. Volta Motor produces more productive, more environmental and higher performance vehicles when compared to its competitors, and has undertaken to provide these vehicles at a reasonable cost to its consumers as its mission. As a result of the growth and quality development that it has carried out in a short timespan it has gained sales representatives in various countries of the World.

It has been making the most extensive electrical vehicle production at its modern integrated production plant which is located within Gümüşova Organized Industrial Zone.

Its machines and equipment are industry-leading. At the same time in respect of dealer and customer loyalty it has made a difference by applying the principle of fair trade within the sector. Sustainable quality and customer satisfaction are always the priority of the company.

Our aim is to make transportation which is socially everyone's common issue safe, economical and joyous.

Our vision is to be a recognized and in demand as the trademark in the market of electrical vehicles in the World. And our mission is to prioritize environmental consciousness without compromising from quality when providing safe and economical transportation to our customers.
